

# MISATU GAS PRE HEATER CO2 & NITROUS OXIDE

GAS HEATERS FROM MISATU MANUFACTURING KEEP YOUR WELDING GASES FLOWING AND PREVENT DOWN-TIME AND DAMAGE TO YOUR EQUIPMENT.

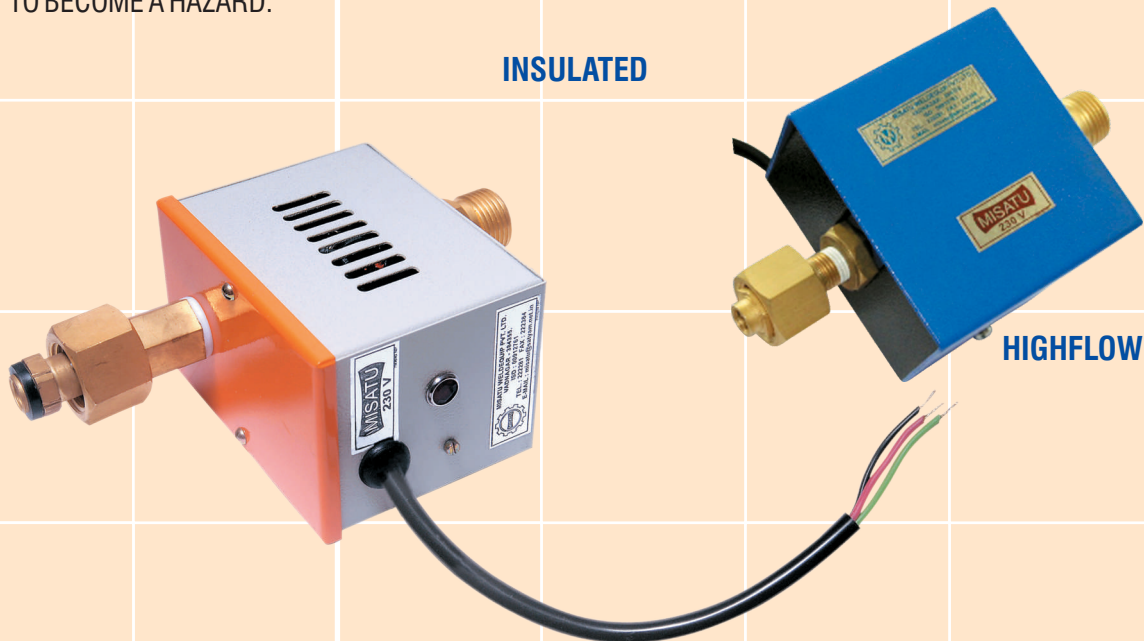

AS GAS IS DRAWN FROM THE SUPPLY CYLINDER, IT CAN RELIQUIFY AND/OR FREEZE YOUR EQUIPMENT DUE TO TEMPERATURE CHANGE CAUSED BY EVAPORATION, STOPPING YOUR WORK COLD!

## PREVENT REGULATOR FREEZE UP

SINCE THEY ARE NOT INSULATED FOR OUTDOOR USE, THE HEATERS MUST BE PROTECTED FROM MOISTURE AND WEATHER OR CLIMATIC CONDITIONS THAT COULD CAUSE ELECTRICAL EQUIPMENT TO BECOME A HAZARD.

## INSULATED

MISATU GAS HEATER WITH A HEATING ELEMENT, A THERMOSTATIC CONTROL, AND INDICATOR IN A TOTALLY ENCLOSED UNIT THAT HEATS THE GAS TO A UNIFORM USEABLE TEMPERATURE BEFORE IT ENTERS THE REGULATOR/FLOWMETER.

## : ADVANTAGE :

**ALL NUT / NIPPLE ARE DETACHABLE • HEATER CARTRIDGE EASY REPLACABLE**

## : WARNING :

FOR USE WITH NON-COMBUSTIBLE WELDING GASES ONLY.

MISATU GAS HEATERS ARE INTENDED FOR USE ON 36 V / 42V/110V/230V, 50/60 HZ, SINGLE PHASE AC ONLY. USE ONLY WITH 3-WIRE GROUNDED, ELECTRICAL EXTENSION CORD AND SOCKET.
